

A word cloud featuring various biological signaling pathways and molecules. The words are arranged in a non-uniform, overlapping manner, with different colors and sizes. The colors include shades of purple, blue, green, yellow, and red. The sizes of the words vary, with 'JAK' and 'RTK' being the largest. The words are: TCR (purple), TNF (blue), TGF (yellow), NHR (red), HIPPO (red), NOTCH (yellow), GPCR (blue), RHO (red), HEDGEHOG (purple), JAK (purple), BCR (orange), RTK (yellow), AUTOPHAGY (green), TLR (yellow), and WNT (purple, oriented vertically).

TCR TNF TGF NHR
HIPPO NOTCH GPCR RHO
HEDGEHOG JAK BCR
RTK AUTOPHAGY TLR WNT
