

A word cloud featuring various signaling pathways and receptors. The words are arranged in a non-uniform, overlapping manner. The colors used are purple, teal, orange, red, green, and blue. The words are: NOTCH (purple, vertical on the left), TLR (teal, top left), NHR (purple, small, below TLR), BCR (purple, top center), HIPPO (orange, top center), TGF (orange, top right), TCR (red, top right), JAK (teal, middle left), RTK (red, middle center), GPCR (teal, vertical on the right), WNT (orange, bottom left), TNF (green, bottom center), RHO (red, bottom center), and HEDGEHOG (purple, bottom right).
